

## THE POTATOES CHIPS, home made funny songs

According to wikipedia, the POTATOE CHIPS was invented by the chef George Crum in 1853, but that's another story.

Our **THE POTATOES CHIPS** are two brothers from Seville, **Abraham** and **Paul**, 14 and 12 years old respectively, raised between musical instruments from early childhood, so they had all the possibilities to be artists. Abraham attends 3<sup>rd</sup> course of piano at the Conservatorio de Morales Cristobal de Sevilla, playing the piano since age 4 and make songs from 6, has also been part of the Youth Orchestra of Aljarafe. Paul, meanwhile, plays the ukulele, guitar and percussion, after going through the Conservatory, is now receiving drum lessons, bass and guitar, and devoured the YouTube videos to learn from the old masters: Beatles, Rolling Stones, Kansas or Nirvana.

The songs were out playing at home with his father who plays guitar, in the family atmosphere and the result was a demo full of songs and fun, made with all natural, such as playing and mixing blues, reggae, rock, country, funk, lyrics in English, French phrases, Argentine accent ..... savvy made music!  
With a demo have attracted the attention of Carlos Herrera who play the songs on Onda Cero Radio. At PSM Music we had very clear ...

Lest anyone think that **THE POTATOES CHIPS** are a band made in records label.... they are very young, yes, but they are musicians and their live show as everybody can see and listen in a recent performance at Seville in conjunction with the International Day of the Rights of the Child.
